

Saltillo Tile

Installation Materials

TOPCOAT SEALER

If my tile is sealed, why do I need topcoat sealer?

Great Question! We recommend that a good quality topcoat sealer is applied after the tile installation is complete. This protects the surface of the tile with scratch-resistance & UV protection. It also provides your desired final sheen and seals the grout.

TerraNano Sealer

- \$199/Gallon, 10-15 year lifespan
- Extra Low Gloss or Gloss Finishes Available
- Environmentally-friendly, Low VOC/Odor
- Very high abrasion resistance
- 400 sf coverage per gallon (approximately)

Crest Sealer

- \$108/Gallon, 3-5 year lifespan
- Natural or High Gloss finish options
- Low Odor
- Medium abrasion resistance
- 400 sf coverage per gallon (approximately)

THINSET

We offer high-quality thinset for your Saltillo Tile installation. It's important to use proper thinset with handmade Saltillo tile to avoid unnecessary issues in the future. In most orders, thinset can ship with your tile at no extra shipping cost.

Crest Gran Formato Thinset

- \$27/bag
- 30-35 sf coverage per bag
- Overcomes irregularities in tile thickness
- Suitable on a concrete slab or backer-board substrates

CRACK PREVENTION & WATERPROOFING MEMBRANE

Crack prevention membrane is needed for application on existing hairline cracks (on a slab) or between backer-board joints. This will help to prevent hairline cracks from appearing in your tile floor. Full coverage application is recommended on new slabs. This product doubles as a waterproofing membrane. The membrane is needed as full coverage in wet outdoor areas.

Crest 2510 Acrylic Membrane

- \$80 per 1-gallon, 45 sf coverage (approximately)
- \$210 per 3.5-gallon, 135 sf coverage (approximately)
- Apply at 30 mils wet film thickness
